To the Public.

The Sentinel, having closed the circulation in every city, and more than twice as many as any other paper here, renders it fit the charges and most demands in Milwaukee for all classes of Advertising, even those of the column of The Daily Spy, will avail himself of the columns of The Daily Spy, especially when he can do so at the same price, and with more space, and secure more than double the advantage of circulation.

This is no boast, but every word true.

For Telegraph, &c., see Fourth Page.

Personal Items.

EDWIN BOOTH, the young tragedian recently married Miss Devlin, an actress of some celebrity.

The somewhat notorious DANIEL PRATT has challenged Douglass to meet him in debate at New York.

The HEALTH of Archbishop HICKEY is said to be very poor. He has gone on a trip to St. Catharine, Canada West.

Good News.—We are pleased to learn that on Wednesday last, Hon. THOMAS MARSHALL of Kentucky, lectured on Transparency at Poughkeepsie and at the close signed the total abstinence pledge.

The Peoria (Ill.) Transcript says that a family of Germans in that city, consisting of a father and five sons, all hitherto staunch Democrats, have joined the Republican ranks since the great speech of Carl Schurz at that place. A Democratic Committee waited on them to coax them back, but the sturdy Germans gave them a decided rebuff.

Mr. J. D. FLETCHER, a leading citizen of Galesburg, Ill., and heretofore a strong Douglas man, publishes a letter in the Herald of that place, declaring his intention to support LINCOLN for the reason that he sees no possible chance for electing Douglas and prefers LINCOLN to BUCKNERWOOD or JON LACE.

AMONG the late promotions made by the President is that of First Lieutenant G. H. DIXON, to the rank of Captain, "for having served ten years' continuous service as Lieutenant." Mr. DIXON is well known to the reading public as the intrepid "John Phoenix," the correspondent of the Boston Post.

A LETTER from Stryker, Ohio, to the Toledo Blade, says that CUNNINGHAM R. SCOTT, Esq., a prominent Democrat, who was elected prosecuting attorney for that county in the face of one hundred and fifty Republicans majority three years ago, and who is regarded as their best stamp keeper, has renounced all allegiance to the rotten old concern, and goes in for the Rail Splitter.

It is stated that two boys of Mr. Douglass, left by his wife, have come into the possession of a large fortune by the sale of their mother's property, which is located in North Carolina; and it is further stated that Mr. Douglass will visit his connections in that State after he has completed his New England tour.

The Tribune announces that Carl Schurz, of Wisconsin, and F. Hassurek, of Ohio, are now carrying on their campaign in the German states. All the paid German orators in Christendom cannot induce the German adopted citizens to vote for Lincoln. They will, almost to a man, vote for the champion of the right, and people to go to government. *Die Oesterreichische Presse*.

This paragraph is extremely refreshing to us of this region, for we know that about three-fourths of the "German adopted citizens" in the West co-operate with the Republicans. Wm. Mears, Hassurek and Schurz are after the other fourth.—*Civ. Gazzette.*

The Woodford (O.) Register says: "On last Tuesday night the Hon. Edward Archbold addressed a large meeting in the Court House upon the signs of the times in the political skies. He termed the address 'His Address.' Mr. Archbold reviewed the history of the party, and dwelt at length upon Slavery in the Territories, from the time of the formation of the Government down to the present time. He gave the Dred Scott case a searching review, and exposed its whole baseness in a convincing and masterly manner."

Mr. Archbold was formerly a Democratic Senator from this county, and was a member of the convention which framed the Constitution of Ohio. He has lived for twenty years in the West, and is a man of great energy and ability. This led the Democratic hosts of this country, like the French soldiers under Murat, our Democratic friends were always ready to follow where his plumed led the way. He was also a lawyer, and as a friend, a profound scholar, and an accomplished and eloquent speaker, and we are glad to announce that his clear voice and trumpet-like tones will be heard in the pulpit in different portions of the State, warning the people of their dangers, and rallying them under the banners of the only true friends of the people and the Union—Lincoln and Hamlin."

St. Louis seems to be the battle ground of the political parties this summer. Each of the two factions of the Democracy have held their conventions and ratifications within the last month, and the Republicans and Union men have made as many and as imposing displays on their part. The ball is still rolling. Judge THOMAS of Illinois, and Mr. HASSELUK, of Cincinnati, spoke there for the Republicans the other evening, and FRANK BLAKE addresses his constituents, at different points in the city, every night.

A SOUTHERN PAPER expresses the confident belief that in the event of Mr. LINCOLN's election, no man will dare to accept office under him in any Slave-holding state. To which PARTRIDGE replies:

"We should regret exceedingly to see Lincoln elected, but sooner than let all the offices in Louisville remain vacant, would take few of them ourselves—if only to show we were not afraid."

A DOUGLAS PAPER, in allusion to Mr. BUCHANAN, questions and replies thus: "Where are his friends? We are almost ashamed to answer that as he has none, save those he has bought."

To this the Boston Post says: "We will ask a question and answer it, also. Who are his enemies? Those he refused to buy."

SINGULAR ACCIDENT.—Last Saturday a New Yorker named JOHN LEWIS, while swimming off the Battery, came in contact with a sharp stone under the water, which cut his abdomen open and allowed his bowels to protrude. He was taken to the Hospital, the protruding intestines replaced, and Lewis is now doing well.

A COUPLE of SOUTHERN BRAVES recently went across the Mississippi from St. Louis, to fight a duel. They exchanged shots with rifles, at a distance of fifty yards, and "nary one" was singed. Their honor, however, felt better, and they returned overlasting friends.

IT HAS BEEN ESTIMATED that during the last season, Pierce county exported one thousand bushels of grain. It is probable that this season double that amount will be exported, and perhaps more.

Waupun.—The State Prison—The Convicts, &c., Correspondence of the Sentinel.

WAUPUN, July 30, 1860.

How do I like Waupun? Outside of the walls, I like it first-rate. I like to look up at the armed guard, and snap my fingers at him. I like to feel that it is none of his business what kind of clothes I wear; in short, I like to be free. Don't you think we need a little oppression occasionally to make us feel more intensely the priceless boon of liberty? I know we do, but no master now, we will look inside.

Waupun is a pretty little village, located up by an excellent agricultural country. It is full of cozy cottages, will dairy yards in front, where fresh rosy-cheeked girls are sauntering about braving the poises. I should think nearly every man owned a cow, and I have seen no villages in the State where the people appeared happier than here. Every family seems to be an independent little kingdom, ruled by a happy autocrat.

They have negroes in Waupun, and jolly ones too. Leaving over their violins, their lively heels beating time, they look like uncouth brothers of Apollo—"in a shanty!" I like rather like a negro, if he be—1st, of the "male persuasion"; 2d, and, a dancer, a whistler, or singer, or fiddler.

It is a relief to look on one of these rich, jolly children of the tropics, full of nature's rank essences, mingled with many sweets, after one who has got tired of the hard, sharp, fiery features, and nasal tones of Yankees.

No very large class of white men would ever want to make negroes bosom companions and equals; in any respect, any more than a Negro would want coarse flowers to be a quest for my lady's bosom; but every one (but a Democrat) must admit that the sun-flower has good a right to the sun, and the rain, and the merry party left us with their complicated and elegant fishing-tackle, their vast cargo of baggage, and their irresistible cheerfulness, it seemed as if the sun that beat upon Alexandria Bay. There seemed to be no real obstacle in the way of their complete happiness; and when we had reached nearly the last of the Thousand Islands, and the party was gone, we were almost without pleasure-seekers and tourists. The greater number were young people full of frolic and animation, whose very presence was enough to drive away a fit of the blues. Among the rest were a bridal party of ten, who, with health, beauty, and plenty of "surfeit funds," were bound on a fishing excursion for Alexandria Bay. Madison, June 28th, 1860.

Democratic New and True.

Mr. H. J. PAINE, of this city, addressed a Democratic meeting at Manitowoc a few days since, and exhibited a copy of a handbill for a Democratic meeting, used in 1848, when Nelson Dewey was the candidate for Governor; Mr. A. BARLOW, for Secretary of State; Col. FAIRCHILD, of Madison, for Treasurer; and S. PARK COOK, for Attorney General. The following were among the lines, in big capitals:

OPPOSITION TO SLAVERY EXTENSION!
NO MORE SLAVE STATES!
OPPOSITION TO BANKS AND BANKING INSTITUTIONS!

The Convention which nominated this ticket passed resolutions against any more slave states, and against the Fugitive Slave Act. Such was Democracy in 1848. Now, in 1860, it goes in for Slavery Extension, and worships the Fugitive Slave Act.

Douglas compared with Himself.

In 1860, in a speech at Galesburg, Illinois, STEPHEN ARNOLD DOUGLAS than declared for popular sovereignty.

The great fundamental principle of government, that "the people of a territory shall be free to decide for themselves what shall be the nature and character of their institutions."

In the same year, a few months later, the champion of this doctrine had occasion to visit New Orleans, and behold what a change came over him in this comparatively brief period! In a speech delivered in that city he allowed himself to say:

Slaves are regarded as property, and placed on an equal basis with other property. Hence the owner of slaves, the same as the owner of any other species of property, has a right to carry his territory or carry his slaves where he pleases.

In a speech in the Senate last February, Mr. D. forgotful of his Galesburg oration, said:

I do not hold that Southern Secession is responsible for the fact that we have such as sovereign power attaches to a territory as a territory. We hold that a territory is a territory, and that we have a right to do what we please with it in the name of the Constitution under the organic act, and vice versa.

A few weeks later, in order to show the South how popular sovereignty had operated to the advantage of slavery, he said in his speech in the Senate:

Under this doctrine of non-interference the people of New Mexico have converted a tract of desert land, now the state of New Mexico, into slave territory.

In his speech in the U. S. Senate in 1848, Mr. WEBSTER said:

The real meaning, then, of Southern gentlemen, in making this complaint, is that they cannot go into territories where there is no slave power, and for some time past, in opposition to slavery extension, they have claimed the right to do what they please.

It exists only by local law. All who are engaged in the work of the Buffalo Convention.

In his speech in the U. S. Senate in 1848, Mr. WEBSTER said:

If my friends, the term "free soil" party, or "soil man," is meant to designate us, we have been fitted out with a name, and for some time past, in opposition to slavery extension, they have claimed the right to do what they please.

It exists only by local law. All who are engaged in the work of the Buffalo Convention.

In his speech in the U. S. Senate in 1848, Mr. WEBSTER said:

There is a particular good to be derived from this doctrine, that is, to prevent the creation of new slave states.

Sir, wherever there is a particular good to be derived from this doctrine, that is, to prevent the creation of new slave states, the same as the owner of any other species of property, has a right to carry his territory or carry his slaves where he pleases.

The report was received among the French that the European diplomacy was about to drive away the Turks from Europe, the Druse, determined on exterminating the Christians in Syria.

Letter from Pike's Peak.

St. Joseph, August 2—P. M.
The Gazette of this morning contains the latest news from Pike's Peak.

The Express, another City, which cost \$100,000,000, \$12,000 in cash.

There are at present about one hundred quartz mills in the mines, only a few of which are up and in working order; some which, worked by experienced engineers, realized a good profit, but the others, while they did not run so well, could not be sold for less than \$100,000.

Six men, in one claim, have taken out in 8 days 4 to 5 pounds of gold. Other claims are worth \$100,000 as good success.

Crimes of all grades prevail to considerable extent in that vicinity.

A destructive tornado passed over Maryville, Kansas, July 26, demolishing every thing that stood in its way. Reaching two miles, two business houses, platform and printing offices were blown to atoms, and the post office was turned around and set in the street.

Everything in the place was more or less destroyed. Lives reported lost. During the heavy storm which struck our city a few days ago, the second school house and a residence were struck by lightning, but not seriously damaged.

Fires in Texas.

New Orleans, August 2—P. M.
Garrison states that the fire at the large flouring and lumber mill at Austin was burned on the 26th. Loss \$100,000.

It was the work of an incendiary.

A negro boy, setting fire to a building in Georgetown, and confessed he was incited by two Abolitionists to burn the town.

A dreadful case of Hydrocephalus.

Under date of the 20th of July, Dr. E. P. Gaines writes as follows to the Mobile (Ala.) Tribune, from Tonawanda, in the same State:

"As it has been a disputed point among the medical men of our city whether we have had an undoubted case of hydrocephalus, which occurred in the course of the epidemic, it is my duty to inform the public, that we can have this disease; so that hereafter all those precautions can be put into use which science has suggested in the treatment of this disease. So far as I am concerned, I have no objection to the name of Dr. Tuck, who was walking along the road, a large dog, which was quietly lying down, sprang up and seized her. She caught hold of him, and in the operation of pulling him off, however, bit her hand and mangled it. He also bit her master when he took him off. Mrs. Tuck visited me the following day to have the dog removed. She was very ill, and also inflamed. As we testimony therefore was so strong that we had no hydrocephalus in this epidemic, and as it was the season of the year, that we would scarcely expect to find it, and as the dog was not far from us, his master, and the dog was mad.

After this he returned home, he acted so stupidly that the master concluded he was mad, and therefore shot him. This, however, was but a surmise, as he was truly mad, the sequel will show. Mrs. Tuck was much suffering, and many others remained so little unwell; on Tuesday had some pain in the right hand and arm, (the one that was bit,) which turned up, and the stabs were on her right side. She also felt a little pain, and had some headache. On Wednesday

these disagreeable feelings continuing, she found it difficult to swallow her breath. It produced a spasmodic feeling; in word, the effort to drink took away her breath. I saw her on Wednesday evening lying down on a bed, drooping over, looking quite natural, but pale, weak, and fatigued, asked her how she felt, but said she had a burning thirst for water, but could not take it.

I had some bright light to her, and gave it to her, and the very sight of it caused a spasm of all the respirating muscles. You had a dash of cold water thrown at your breast; you then takes away your breath. In this manner did the very sight of water affect her, causing such a feeling that the patient cried "away with you, I will kill me." Imagine in this dry heat, when she was in the atmosphere, that she had a terrible thirst, the very sight of water should produce such an effect. Can anything more horrible? On Wednesday night, urged by this desire, she got up, and went to the bucket of water, saying, "I'll drink water, but not on reaching it, she would have fallen, her daughter told me, if she had not caught her.

On Thursday the spasms became more frequent; the patient was tormented by the throat, which added to the distress, causing a constant hawking and spitting. The countenance seemed more and more haggard; she was pale, however, and recognized easily. She desired to hurt any one, but the said and keeping above even, pieces are sustained. There is no relief for the patient. Gold is quiet but already

had some bright light to her.
